MEMBERSHIP
FORM

"Joining this program is a win - win! We earned free solar panels for our town, and provided support for wind power at the same time- it's a great chance to do the right thing!"

-Kate Crosby, Acton MA

MASS ENERGY

Mass Energy Consumers Alliance is a non-profit with 25 years experience making energy affordable and sustainable. Local volunteers and groups in your community are working in partnership with Mass Energy to promote clean energy choices.

FEEL GOOD ABOUT YOUR ELECTRICITY

Mass Energy's *New England Wind Fund* program is an easy way to offset your electricity use with clean wind power. Moving from polluting fossil fuels to zero emission local wind energy is an important solution in fighting climate change. Wind power is more expensive right now and needs your support. When you make tax deductible contributions to *New England Wind Fund*, you support wind turbines that put more clean energy into the electrical grid.

COMMUNITY SOLAR CHALLENGE

The Clean Energy Choice® program of the Mass Technology Collaborative rewards communities who support clean energy. A community earns a 2 kilowatt solar system when 150 households join *New England Wind Fund* by making qualifying contributions between May 1, 2007 and April 30, 2008. 300 qualifying members earn 2 systems! A \$100 annual contribution or a \$5 monthly contribution (or above) qualifies for the challenge. More information available at CleanEnergyChoice.org. Last year 6 communities won- your town can too!
